I am a Python Backend Developer with 7+ years of experience. I apply spec-driven development to AI systems and leverage contemporary agentic coding tools to amplify output. Looking forward to working at the intersection of product, engineering, and AI.

EDUCATION

NIIT University

Neemrana, India | 2013 – 2017

B.Tech, Computer Science and Engineering

SKILLS

Languages

Python | JavaScript

Frameworks

Flask | FastAPI

Databases

PostgreSQL | MySQL | Google
Datastore | Redis | Weaviate

Cloud / Deployment

AWS EC2 | Google Cloud Pub/Sub |
Digital Ocean | GitHub Actions

Tools

Git | Docker | Celery | Claude Code |
Gemini CLI

API Integrations

OpenAI | Claude API | Slack |
Razorpay | WebEngage | Gmail

AI Engineering

LLM Applications | Agents | RAG
Systems | LangGraph | MCP

PROJECTS

Prepit

RAG-based knowledge base for
interview prep. GitHub ↗

HumaraCart

Shared household cart agent on
WhatsApp built using Instamart's
MCP server, for Swiggy Builders Club.
GitHub ↗

COURSES

Authored a LinkedIn Learning course
on Python Sets and Frozen Sets, later
expanded with in-depth, hands-on
exercises, reaching 6,799+ learners.

WORK EXPERIENCE

IIT Madras

Senior Software Engineer

Remote | Jul 2024 – Present

- Built student marks batch upsert via Google Pub/Sub to process 70,000–80,000 weekly score uploads in parallel.
- Built exam city preference module with validation and payment handling, serving 37,000+ students across 3 programs.
- Built JWT-based source verification (ES256) for cross-app access control, serving 40,000+ students.
- Refactored application form into a configurable multi-institute product; launched for IIMU with 1,000+ students.
- Migrated credentials to Secret Manager and Parameter Manager across multiple projects.

Peppo Technologies

Senior Software Engineer

Remote | Aug 2021 – Apr 2024

- Owned end-to-end development and maintenance of the settlement service, serving 76,000+ unique customers.
- Drove settlement success rate to 100% by reducing merchant escalations to zero.
- Added Celery-based async processing, handling peak loads of 8,000+ customers.
- Automated GST reporting and monthly invoice generation, reducing manual effort by 50%.

Team4Adventure

Independent Consultant

Remote | Jan 2020 – Jul 2021

- Built a JSON-based custom CMS replacing WordPress, delivering 50% improvement in page creation speed.
- Built a Query & Booking Management system reducing per-booking processing time by 75%.

Goibibo

Software Engineer

Gurugram | Aug 2018 – Jan 2020

- Built and maintained API integrations for partners including Criteo and WebEngage.
- Automated data pipelines to generate daily reports, reducing manual effort.

KreditBee

Data Engineer

Bangalore | Dec 2017 – Aug 2018

- Designed APIs and core business logic for the product's rule engine.
- Integrated multiple external fintech partner APIs for data exchange.

Reckonsys Tech Labs

Software Engineer

Bangalore | Aug – Dec 2017

- Built backend features for Kredily using Django REST Framework.

CONFERENCE TALKS

- “Building a Bot for WhatsApp using Python and Flask” at Women Who Code (Virtual), 2020 (5.3k+ views).
- “Rest API Integration with Python” at Women Who Code (Virtual), 2020 (4.2k+ views).
- “Automating Data Pipeline using Apache Airflow” at PyData Delhi 2019 (2.8k+ views).
- “Object Internals in Python” at EuroPython Conference (Virtual), 2020 (international conference).
- “Memory address in Python” at Remote Python Pizza Conference (Berlin), 2021 (international conference).
- 4 additional talks at international Python community meetups.
